ATRAUMATIC EXTRACTION FORCEPS

This series of 5 atraumatic extraction forceps feature parallel beaks that fully engage both the crown and root structure. The tapered beak style will improve sub-gingival access and help prevent fracture.

Deep Gripping

Deep gripping forceps feature indented and tapered beaks designed for easier penetration to the root structure, especially for fractured or decayed teeth.

EXTRACTION FORCEPS

All Nordent forceps are manufactured of a special surgical stainless steel. Most of the forceps are electropolished to a “mirror finish” for maximum corrosion resistance. Selected patterns feature a smooth, handform style handle in a “satin finish” that is passivated to achieve the same corrosion resistance as the predominant “mirror finish” forceps. All forceps are the American pattern style, unless noted otherwise as “English Pattern.” The English Pattern forceps all have visible pins or screws in the hinge area, whereas the American patterns all feature hinges that are completely polished out and smooth so that no pin is visible.

Upper & Lower Universal

**Cryer #150A**
Upper incisors and premolars, parallel beaks, universal.

**Chukas #150AS**
Upper bicusps, incisors and roots, anatomical beaks, universal, serrated beaks.

**Cryer #150**
Upper incisors and premolars, universal.

**Cryer #151**
Lower incisors and premolars, universal.

**Cryer #151A**
Lower incisors and premolars, parallel beaks, universal.

**Chukas #151AS**
Lower bicusps, incisors and roots, anatomical.

**#203**
Lower incisors, bicusps and roots, universal.

PEDODONTIC FORCEPS
Mini-Pedo English Style
The Klein series of Pedodontic forceps all feature spring loaded handles. They are the smallest of the pedodontic forceps with overall lengths of 10-11 cm. This small size makes them very easy to conceal in the hand to reduce patient anxiety.

English Pattern Klein #137
Pedodontic, upper incisors, spring handle.
FE137/Klein

FE7/Klein
FE7/Klein-SER (serrated)

English Pattern Klein #6
Pedodontic, lower molars, spring handle.
FE6/Klein
FE6/Klein-SER (serrated)
PEDODONTIC FORCEPS
American Patterns
The classic American style forceps average 15-16 cm in length. The original 150 and 151 “SK” Kinder style forceps are only 12 cm in length with spring handles and can be concealed in the hand to reduce patient anxiety.

#101 Pedodontic upper, universal.
#150SK Pedodontic upper, universal, anatomical handle with spring, satin finish.
#150S Pedodontic upper, universal.
#150SAS Pedodontic upper, universal, anatomical beaks, serrated.

#23S Pedodontic cowhorn, lower molars, universal.
#151SK Pedodontic lower, universal, anatomical handle with spring, satin finish.
#151S Pedodontic lower, universal.
#151SAS Pedodontic lower, universal, anatomical beaks, serrated.
